

Spectrum Fixed 3G - Wireless Data Services

Simple, Limitless, PCI Compliant Wireless Service

With zero fall out, high reliability and speed of deployment, many of our customers initially look to Broad Sky as a replacement for their expensive frame relay, but having experienced the Broad Sky difference, customers have also turned to Broad Sky to displace DSL and cable as their primary network solution.

Our Wireless data network is comprised of the four leading wireless data providers servicing the United States, Puerto Rico and Canada. Our ability to identify which carrier is best suited for your location is just one of many advantages Broad Sky provides. Because of our attention to market demand we have built the first PCI Compliant wireless data network in the country.

Service Level Agreement: Industries only Fixed Wireless Broadband Service Level Agreement with 99.9% availability.

RF Management: Our management tools evaluate, report and monitor Radio Frequency health at the site level.

Engineering: We provide engineering design and consulting at no additional cost.

Support: Help desk support offers 1st and 2nd level support and is available 24x7x365, including holidays.

High Availability: Service areas cover 95% of the United States population.

PCI Compliant: We are the first and only fixed wireless broadband provider with a PCI Compliance certificate.

Fast Deployment: Standard provisioning lead time for installation is just 3 business days or less.

Proprietary & Enterprise Equipment: We provide managed proprietary patent pending bundled equipment.

Pro or Self Installation: Customer and professional installation with an optional antenna to assist meeting our SLAs.
