

Broad Sky Networks

The Solution to all your Wired and Wireless Data Needs

Broad Sky Networks offers a full suite of Business Class wired and wireless broadband services from WiMAX to Satellite, 3G/4G, to T1 and Ethernet. Broad Sky Networks was founded by Telecommunication and Technology experts to provide a single source for the delivery of Business Class Broadband Satellite, 3G/ 4G, WiMAX and Optical Wireless Broadband services. In addition to offering superior wireless services, we also provide other ancillary services to fulfill service portfolio requirements to allow customers to stay focused on their business.

Spectrum WiMAX

Broad Sky Networks now offers Spectrum WiMAX, a fixed-wireless solution in 88 markets - the largest footprint in the industry. Our Spectrum WiMAX bypasses the local telco, so installation can happen in days, it is easy to deploy and scale and offers bandwidth from 2Mbps to 1000Mbps for a fraction of the price. Our WiMAX up-time is guaranteed 100% and allows the addition of managed services or Point-to-Point offerings.

- 88 major metropolitan areas
- Point-to-Point services
- Primary or Redundancy
- Great for fluctuating bandwidth needs
- Large bandwidth, 2Mb – GigE speeds

3G/4G Fixed Wireless

Broad Sky now offers our Spectrum 3G fixed-wireless service, covering 90% of the United States population. Our 3G service is a great alternative to DSL. We use all three major carriers, offer innovative equipment bundles and flexible pricing options. We also offer a fully-managed 3G service perfect for retailers, banking, M2M, etc. and mobility options as well.

- Primary, Redundancy, Mobile or Temporary
- Average 3G speeds of 1.5MB x 384Kb
- Layer 3 or Layer 2 options
- Average 4G speeds of 10MB x 4MB

T1 & Ethernet

Broad Sky Networks T1 and Ethernet broadband connections are delivered by the most knowledgeable employees in the business, to the savviest customers in the United States. Ethernet, delivered over copper pairs, is fast becoming the broadband of choice for businesses everywhere. It offers flexibility in speed, quick installation and affordable prices. Complement your Ethernet service with high availability T1s or bonded T1s, allowing you a complete network coverage solution.

- Delivered over copper
- Flexible speeds from 2M up to 20MB
- Quick installation
- High Reliability

Satellite Broadband

Broad Sky offers a large range of satellite broadband solutions, accommodating tele-workers to large private networks. Broad Sky's approach is unique: We offer broadband Internet from six different satellite providers all backed by industry-leading Service Level Agreements. Our satellite supports Internet access, IPsec VPN traffic, POS, VoIP and video applications. We are experts at securely linking locations anywhere in North America, South America, Alaska and the Caribbean.

- Primary or Redundancy
- Disaster recovery plans available
- Speeds up to 10MB x 3MB
- Private Network - Primary or Redundancy
